Reasons For Allowance

Claims 1 – 34 are allowable.

The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest an arithmetic encoder and method that comprise a coding engine coupled to a probability estimator to generate zero or more bits of an information sequence in response to each event and its corresponding probability estimate, wherein the coding engine generates zero or more stuffing bits that are appended to the information sequence after bits generated in response to events, wherein the one or more stuffing bits operate to substantially maintain a relationship between an amount of events encoded, a number of blocks of data being coded and a number of bits generated the coding engine in the information sequence. Also, in combination with other limitations of the claims the prior art made of record fail to suggest an apparatus and method for encoding data comprise a means for generating a bitstream using encoded data including means for adding zero or more stuffing bits to the bitstream after the encoded data generated in response to an event sequence wherein the one or more stuffing bits operate to substantially maintain a relationship between an amount of events encoded, a number of blocks being coded and a number of bitstream. Also, in combination with other limitations of the claims the prior art made of record fail to suggest an arithmetic decoder and method that comprise a decoding engine coupled to a probability estimator to generate an event of an event sequence in response to its corresponding probability estimate and an information sequence wherein the decoding engine recognizes any stuffing bits in the information

sequence and performs no decoding on the zero or more stuffing bits, the zero or more stuffing bits operating to substantially maintain a relationship between an amount of events encoded, a number of blocks coded and a number of bits in the information sequence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean B Jeanglaude whose telephone number is 571-272-1804. The examiner can normally be reached on Monday - Friday 7:30 A. M. - 5:00 P.M..
